MOHAMED SALEEM

Full Stack Developer

📞 9524603619   ✉ hmohamedsaleem7@gmail.com   📍 Thanjavur   [in] mohamed-saleem

ABOUT ME

A highly motivated Full Stack Developer with strong knowledge of HTML, CSS, JavaScript, React, Node.js, and MongoDB. Skilled in building responsive web interfaces and developing RESTful APIs. Quick to learn new technologies with a focus on clean, efficient code. Eager to contribute to dynamic development teams and grow as a software professional.

EDUCATION

St. Joseph's College of Engineering and Technology | Thanjavur   2021-2025

B.E Computer Science Engineering

Gained a strong foundation in programming, data structures, algorithms, databases, operating systems, computer networks, and software development practices.

PROJECT

Snack Station – Java Console Application

A console-based vending machine simulation built using Java.

- Implemented object-oriented programming concepts to manage products,   transactions, and user interactions.
- Integrated file handling for reading and storing item details persistently.
- Enabled real-time user input handling with validation for seamless operation.
- Tools used: Java, NetBeans, Git.

E-Commerce Website – Front-End Development

A responsive online shopping website designed using HTML and CSS.

- Developed an interactive and mobile-friendly user interface with organized product layouts.
- Designed smooth navigation, structured sections (Home, Products, Cart), and call-to- action elements. Applied modern CSS techniques for styling and layout optimization.

SKILLS

- Java, OOP, file handling, console applications
- HTML, CSS, responsive web design
- Git, GitHub, NetBeans, VS Code, deployment
- MySQL, MongoDB (basic), API integration

CERTIFICATION

Completed Full Stack Development certification from Login360, Velachery, Chennai, with hands-on training in front-end and back-end technologies.
